Hi Gurunath,  
Please try with below credentials,  
user: [demo@urjalabs.com](mailto:demo@urjalabs.com), pwd: admin  
Above credential was default credentials as far as i remember.  
If it doesn't work with these credentials, then may be we have removed default credentials, user need to register first that gets authenticated at server side, we need to bring up server as well for this.

Please refer the source code for more details.

Regards,  
Tarun Tomar

Hi Gurunath,  
As i mentioned earlier, I have only client side code(Android app) with me, sharing the same let me know if it is accessible to you.
